## LIBRARIAN'S REPORT.

The growth of the library for the past year has been very satisfactory.

Quite a number have responded to the appeal for donations of books.

We have received one each from Miss May Osgood, John S.

Osgood, Miss Addie B. Rabador, Caleb F. Edgerly, the Granite Monthly Co., Charles W. Sanborn, D. F. Bartlett, Mrs. Mary Boynton, Mrs. George Dearborn, Dr. J. D. Robinson, Mrs. Julia E. Hill, Mrs. J. M. Young, Edson C. Eastman, Hon. J. H. Gallinger; two each from Mrs. S. H. Rand, "A Friend," Charles E. Copp; three each from Andrew J. Coffin, Mrs. Daniel T. Osgood, Mrs. C. E. Norris; six from Mrs. F. W. Spaulding, and fourteen from the Selectmen, making forty-nine volumes donated.

The trustees have added one hundred volumes by purchase, making four hundred and twelve volumes on the catalogue at the present time.

There have been 101 cards issued the past year, making the total number 305; about 150 are in use at this time.

The number of books loaned from March 1, 1894, to February 22, 1895, was 3132, showing an increase of 1159 since the report last year. We hope the contributions of books will continue, as there is plenty of room for more.

GEO. G. PRESCOTT, Librarian.

# Report of the Board of Health.

---

TO THE SELECTMEN OF EPPING :

The Board of Health submit the following report for the year ending February 15, 1895 :

On April 7, the board organized by the selection of F. P. Fisk as chairman and A. D. Brown as secretary.

During the year the complaints have been many and the board have investigated and have done what they could to remedy the cause.

The largest amount paid by the board was for burying two partly decomposed horses, killed and left unburied on the land of W. H. Hodgdon, adjoining the Pratt land, the place where Brighton, so called, is held during camp-meeting week. This unnecessary expense to our town should be done away with. Other towns do not allow it, why should we?

There have been fifteen cases of infectious diseases reported to the board, which are as follows : 8 of typhoid fever (two proving fatal) ; 6 of scarlet fever ; 1 of scarlatina.

There has been something done to improve the sanitary condition of our village during the past year, and there is very much more that should be done.

Your attention last year was called to the brook running through our village, and we heartily approve all that has been said, and still go further ; that said brook has become a nuisance, and great danger to the public health, for nearly all of the sink-drains and refuse of our village are emptied into it, and what should be done is to sink said brook, from three to four feet, and put in a tile, and connect with that now laid in said brook, and run direct to river, and have all sink-drains connected with said tile, and we could have almost a perfect natural sewerage, which would greatly improve the sanitary condition and also greatly improve our village.

We would again urge the attention of the Selectmen and town, regarding the toilet room in our town hall. A complaint having been made, we investigated, and found the ladies' toilet in a very poor sanitary condition, and also the gentlemen's in the basement, and what should be done, is to have the ladies' and gentlemen's toilet on the same floor. There is ample room for both in the ladies' toilet, by dividing the same, and putting in another door; and also put in a flush tank, and connect with the sewer now laid to the river. The expense would not be large, and would greatly improve the convenience of the public.

We wish to thank the physicians who have so kindly assisted in the work, and all who have so heartily responded in the way of improvement.

Respectfully submitted,

L. J. HOLT,  
A. D. BROWN,  
F. P. FISK,

Board of Health of Epping.

In presenting this, the ninth annual report under the present law, we invite special attention to some of the features of our school system exhibited in the foregoing tables, and to a few brief, closing remarks, in relation to the conduct of our schools.

But first, we will make allusion to the twelve weeks' term of Watson Academy provided for by its trustees, and having no place in our report of the public schools of the town district, for which, as shown in the report of our treasurer, the sum of \$161.68 has been paid to the trustees as estimated by them to be needed, in addition to the income of their funds for the current year, to pay the expenses of the term. The payment of this sum was made as required by the terms of the contract of the district with the trustees, made by vote of the district at its last annual meeting and by subsequent concurrent action of the trustees.

The aggregate length of all the district schools during the year was 285 weeks, being 25 weeks more than last year, which excess was made up of one week each in the Grammar, Intermediate, Primary and Exeter road schools, three in East Epping school, four each in North River and Prescott road schools, and ten in West Epping school.

In the column headed "Percentage of daily attendance," in this report, two of the schools are credited with 1.0000 or 100 per cent., which is not correct in fact, although correct under the rules for computing percentage of daily attendance printed in the school registers, which require fractions above one half to be reckoned as additional units. In the records of the smaller schools, the application of those rules frequently makes it appear that the average daily attendance equals the average membership, as in the case of the two schools named; whereas, there has been no such thing as perfect attendance in any of our schools for a single term during the year.

Among the manifold duties of the School Board, none press upon it with greater weight of responsibility than that of providing competent teachers for all the schools. Such being secured, but little supervision is required. But, practically, among the positions we have to offer, some are hard to fill satisfactorily and

occasional failures occur. Good teachers command good positions and good positions attract good teachers, but the supply is not equal to the demand for suitable teachers willing to take the less desirable positions. But this may be an argument for more centralization which it is not our present purpose to make.

Accepting the situation as it is, there is one remedy for inefficient work which seems available and would reach all our schools, namely, the election of a competent superintendent and providing such compensation as would enable him to make it his business to work in the schools and with the teachers, to encourage where found and establish where needed, the practice of the best methods of training, instruction and development. To assure benefit and satisfaction from his work, such an officer should be liberally educated, possessed of a theoretical and practical knowledge of the best modern educational methods, in touch with the best educators of the day and enthusiastically devoted to the work of elevating the standing of the public schools. He would expect a good salary and would earn it if employed, and it is for the district to make provision for such superintendence if desired, by vote at some future annual or special meeting called for that purpose.

Respectfully submitted,

GEORGE N. SHEPARD,	}	School Board.
